

Stakeholder Workflow Diagrams

Astra creator platform: end-to-end user flows for each stakeholder role

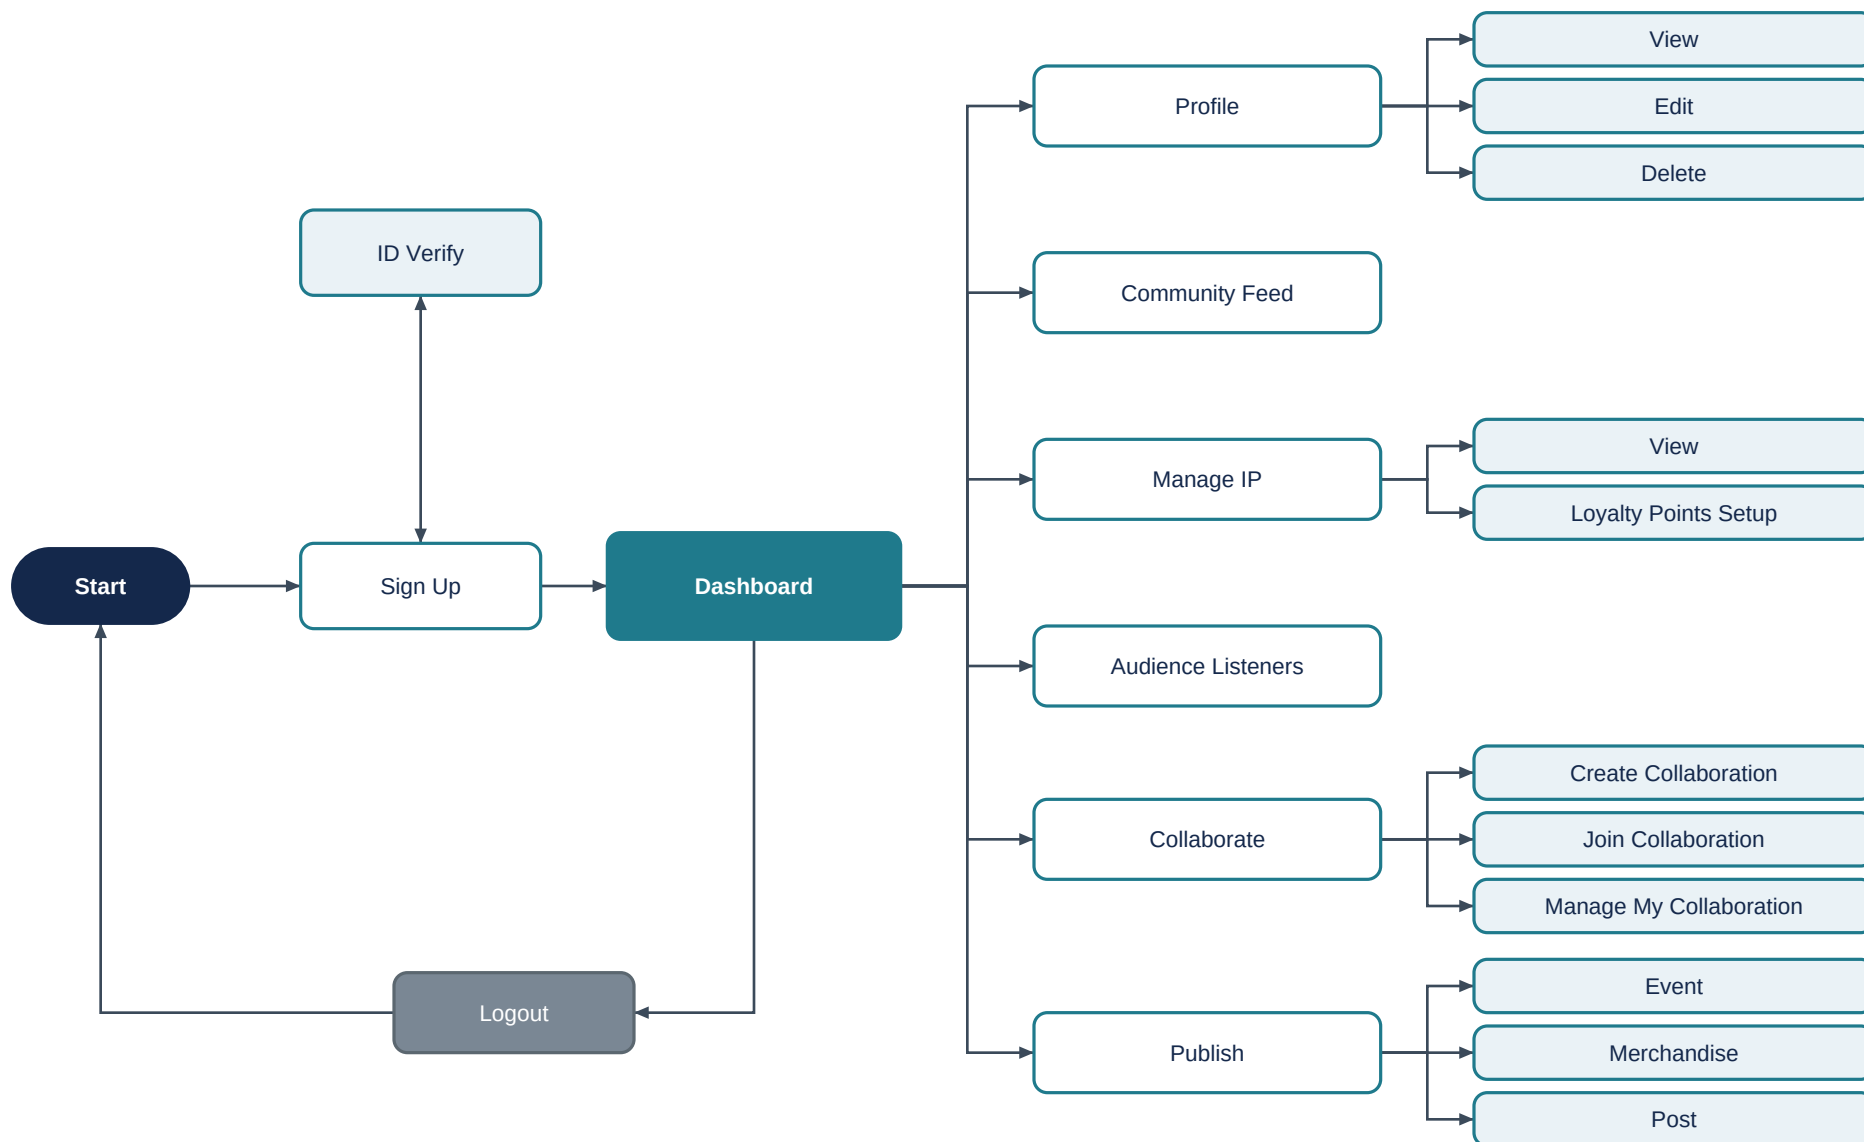

Astra connects **creators** with their **audience** so that creators can own their audience, build relationships, collaborate, manage their intellectual property and develop new sources of revenue. This document presents the workflow for each stakeholder: **Creators**, **Admin** and **Audience**.

Role	Primary purpose	Key capabilities
Creators	Artists and creators building a business on the platform	Sign-up with ID verification, profile, IP management, audience listeners, collaborations, publishing events, merchandise and posts
Admin	Platform owners administering users	Create, view, update and delete Audience and Creator accounts
Audience	Fans who follow, support and buy from creators	Sign-up, loyalty points, favourite artists, cart, checkout, connected apps, community feed

1. Creator Workflow

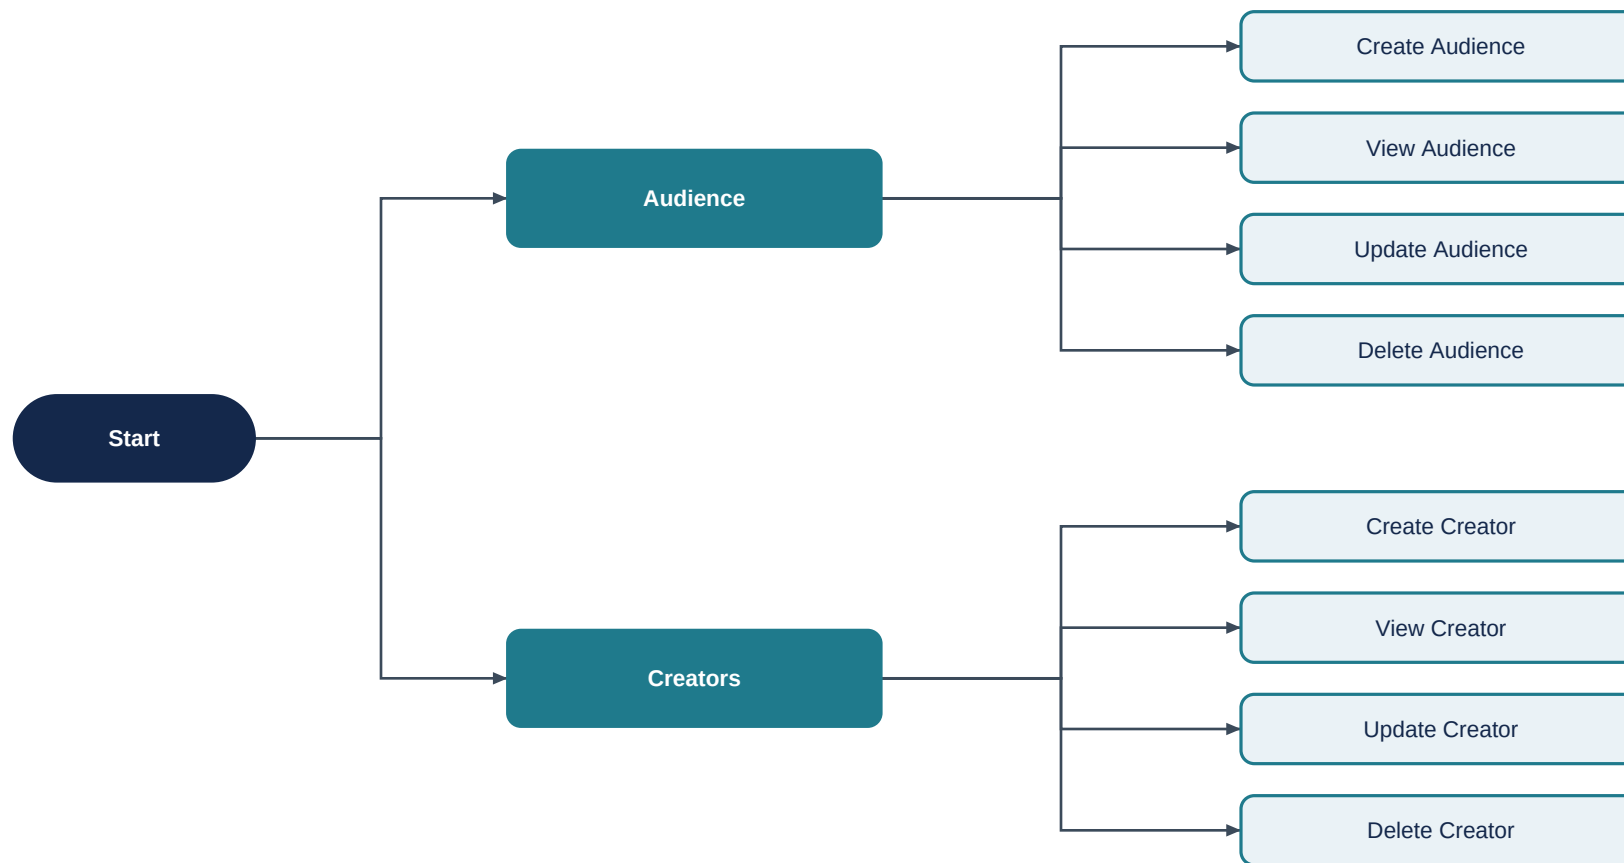

Sign-up and ID verification lead to the creator dashboard, from which all creator features are reached

Note: Event, Merchandise and Post publishing can be implemented as three separate pages.

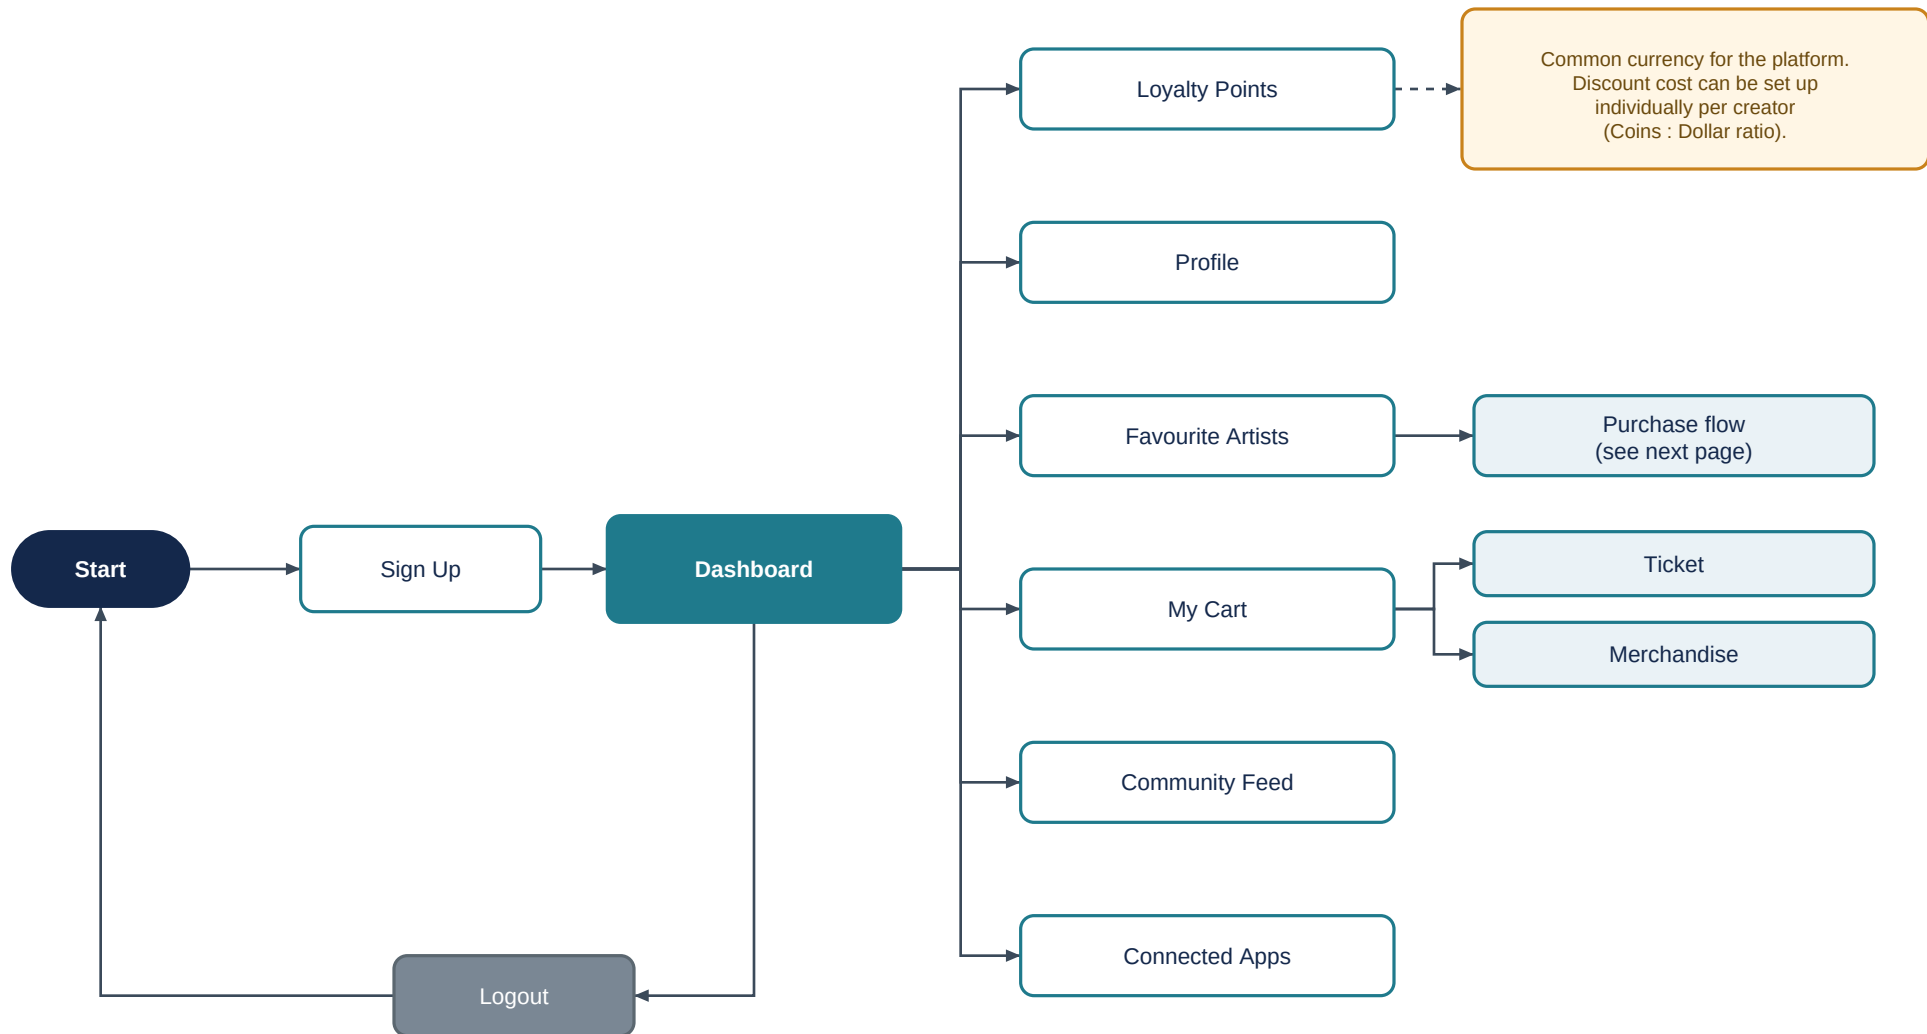

2. Admin Workflow

Administrators manage Audience and Creator accounts

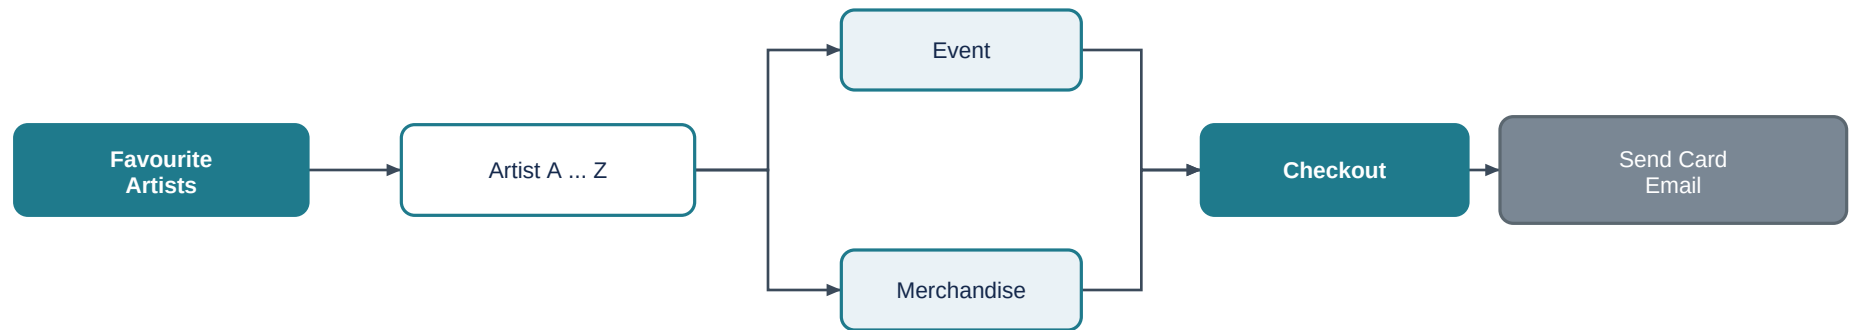

3. Audience Workflow

Sign-up leads to the audience dashboard; purchasing and loyalty features branch from it

3.1 Audience Purchase Flow

From a favourite artist to checkout and confirmation

Audience members select a favourite artist, choose an event ticket or merchandise, complete checkout, and receive an email confirmation.
